Research Plan *

Attach a Research Plan for the thesis or dissertation. The Plan is limited to three single-spaced pages with one inch margins, and Times New Roman 10 point font. The Research Plan should include the following sections: Significance, Approach, Investigator Qualifications and Environment. The following describes each of these sections.

Significance: Describe the importance of the problem that is being addressed. What is already known and how will the proposed research project improve scientific knowledge and/or clinical practice?

Approach: Describe how the research will be carried out. What method will be used to obtain, measure, and analyze the data? What safeguards will be used to ensure that the data are viewed as credible by the scientific community?

Investigator Qualifications: Describe your qualifications for completing the proposed research. Do you have any previous research or professional experience with the proposed topic or approach? How has your training or background prepared you for conducting this particular study?

Environment: Describe the resources, facilities, and support available to you. Your responsibility in this section is to assure reviewers that successful completion of your proposed research is a realistic expectation.

***Research Plan must have approval by your committee.**
